ADVANCED CAPTURE SOFTWARE

CapturePoint™

TOTAL AUTOMATION
POWERFUL FEATURES THAT WILL SAVE YOUR BUSINESS TIME & MONEY

DOCUMENT TYPE RECOGNITION
AUTOMATICALLY CLASSIFY AND ROUTE YOUR DOCUMENTS

CapturePoint begins by automatically classifying your documents. It understands the difference between an invoice or a PO. It can also identify vendor invoice A from vendor invoice B to accurately sort, process, and route them intelligently without human interaction.

INTELLIGENT CLASSIFICATION AND INDEXING
INDENTIFYING TYPES OF DOCUMENTS, PROCESSING, & ROUTING

Once CapturePoint identifies the type of document it can be instructed to search the page for an invoice or PO number, vendor information, or even amounts and totals. Intelligent Indexing eliminates the most time-intensive step in scanning your business documents and does it with higher accuracy.
